Essay

In the current digital age, Copyright is a vital piece of data used to protect and claim ownership of an intellectual property. There are many forms of copyrights all with different effects, costs, and levels of privacy. Depending on what license one may choose for a work can change the way that the work can be distributed/replicated/monetised to varying degrees.

The most common copyright licenses used for online media on the internet are the creative commons licenses, most of which contain the “BY” clause which states that the work can be redistributed and/or be built upon but MUST give credit to the original creator. Alongside the “BY” clause there are many more clauses, such as, “BY-SA” stating that the original work must be credited to the original creator and the new work must be distributed in the same way that the original was. There are also the “NC” and “ND” clauses which state that only Non-Commercial (NC) uses of the works are allowed and that No-Derivatives (ND) are allowed in the case that these clauses are in the select copyright.

Alongside these types of copyright, there is also another type of copyright. The CCo or Public Domain Dedication. This license dedicates the created work to be a public domain and allows for users worldwide to make changes, redistribute and remix with no limits or restrictions.

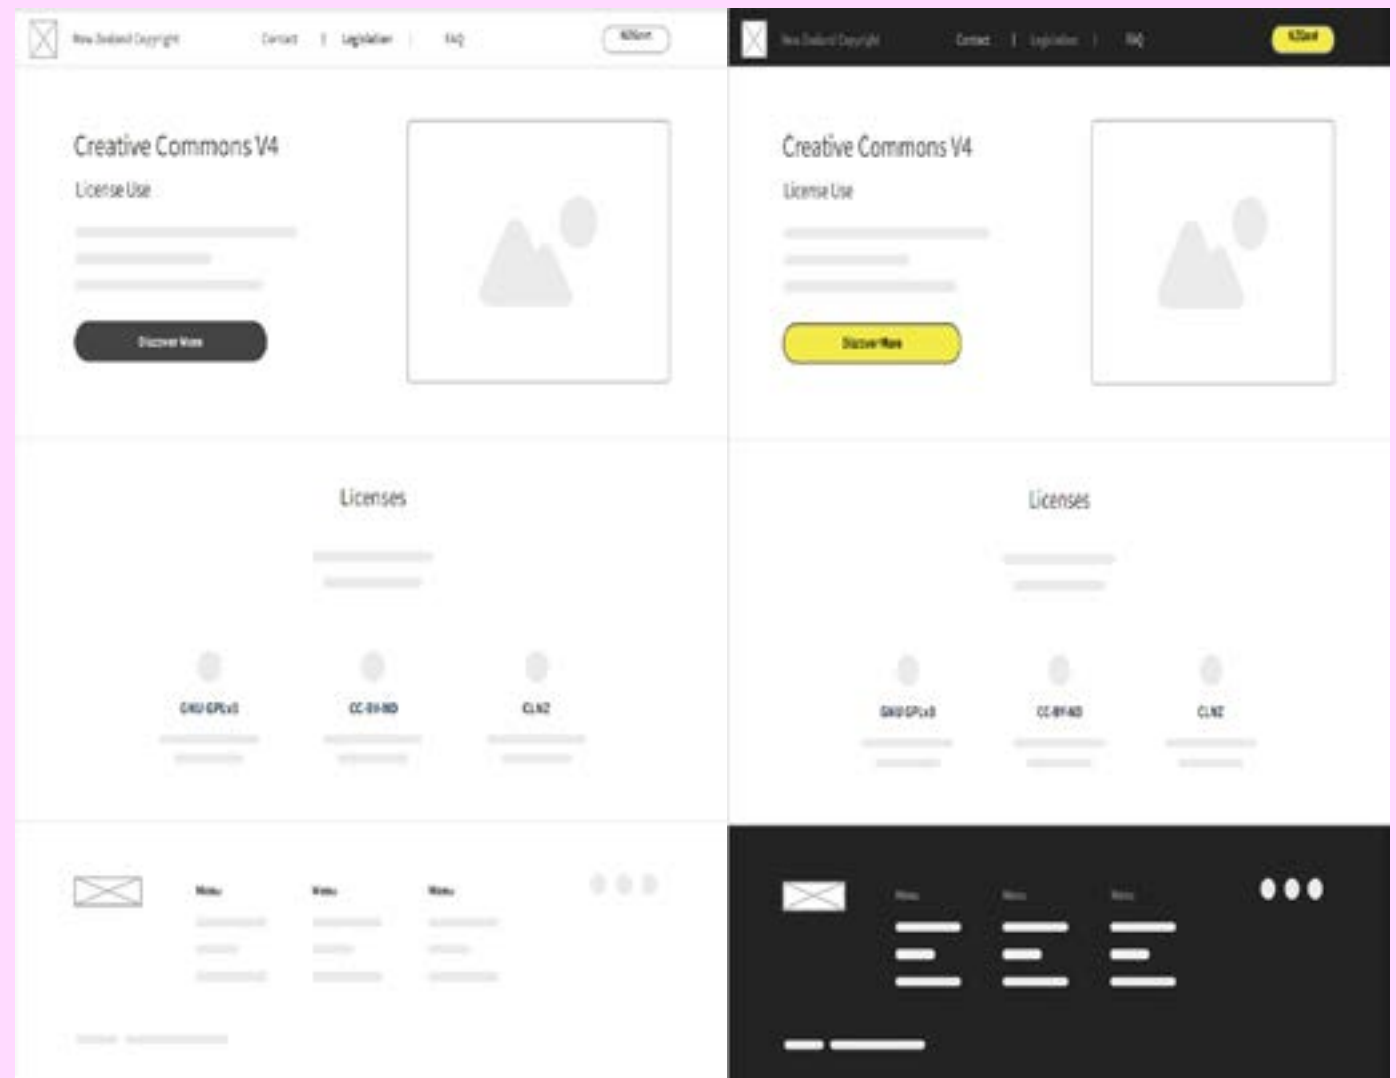

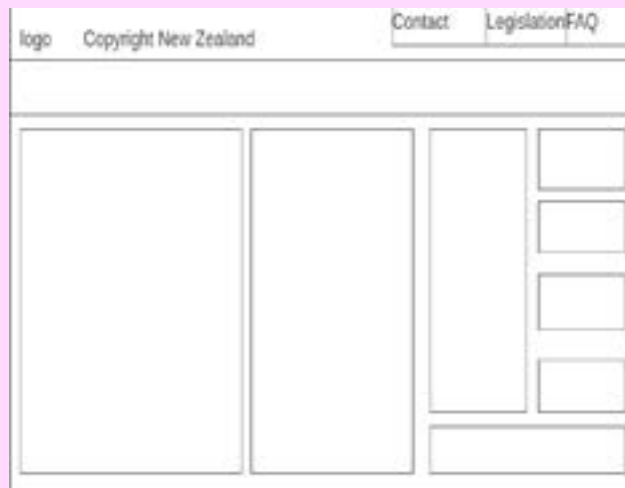

Additionally, the Creative Commons licenses there also exist the GNU Project Licenses which are all free software licenses designed to be packaged with free software. These licenses are often used with freeware and open source projects and allow for copyleft with free software, ensuring that all software based off the original free software are also free.

With all copyright or copyleft licenses it is very important to state the version and type of license that is in use as it dictates to what documented rules the license and work fall under. For Creative Commons licenses it looks like “CC BY 4.0” and for GNU licenses it will look like this “GPLv3” or “GNU AGPLv3”. It is also necessary to include the ‘copyright symbol’ or © before where you state what license as well as what years the copyright has been on a piece of work for. With most licenses for copyright once the license has been applied it cannot be revoked or removed and the license remains in use for the duration of the works existence.
